Jira, Git & Github, Bitbucket, AWS CodeCommit, Netlify, SQLite Studio, Qt Designer, Postman.

### Web Skills:

HTML, CSS, Bootstrap, Javascript, ReactJS, Redux, Typescript, Material UI, React bootstrap, Ant design, REST API, NodeJS, AWS Services- Lambda, DynamoDB, S3, API Gateway, Amplify, Cognito, IAM.

### Databases:

Postgresql, MySQL.

## PROFESSIONAL EXPERIENCE

**Tata Consultancy Services Ltd.** 09/2022 – present | Noida, India  
Software Engineer

- I am working as a Software Engineer in the AWS Product Team.
- I collaborated with the team lead and business consultant to **spearhead a CFO-level project** to develop the **AWS Business Unit Cloud Pricing Portal**, resulting in a **30% increase in efficiency**.
- The project **transformed** traditional **Excel-based calculations** into a robust, enhancing AWS Business Unit's offerings.
- The portal covers nine distinct services, enabling users to calculate and compare **service charges** on a **QoQ** and **YoY** basis.
- Implemented a commercial summary page, providing an overview of yearly charges and the cumulative cost of selected services, leading to a **20% improvement** in **user decision-making** capabilities.
- Utilized **ReactJS** for **frontend development**, creating an intuitive and responsive user interface that increased **user engagement** by **15%**.
- Leveraged AWS services such as **Lambda**, **DynamoDB**, **API Gateway**, **Amplify**, and **Cognito** for **backend development**, ensuring a robust and user-friendly platform. This resulted in a **25% reduction** in server-side errors.

**Airtel Digital** 09/2021 – 03/2022 | Gurugram, India  
Software Development Engineer- Intern

- I worked as an **SDE-Intern** at Airtel Digital in **Decision Tree Team**.
- Worked in an **Agile (scrum) environment** and collaborated with cross-functional teams for engineering a **white-label internal admin platform** named **Single Service Portal** for **developers** and **product operations**.
- Engineered **Single Service Portal** with senior developers that **reduced sprint time and effort** for changes to get into production from **14 days to a few clicks**. It facilitated the testing of iterative design changes without affecting the product in production.
- Used technologies such as ReactJS, Redux, Typescript, Material UI, Figma, and Bitbucket.

## PROJECTS

**Algo-Engineering** 12/2020  
• Open-source Library of 280+ Data Structure and Algorithms.  
• Contains important C++ concepts and solutions to contest on various platforms.

**Trishul "The Tech-Carnival"** 12/2019 – 02/2020  
Software Developer  
• I developed a scalable web-based end-to-end product for the Technical festival of H.N.B Garhwal University (A Central University).  
• The portal influenced over **15,000 students** of Garhwal University, over **1,000+ students** of **NIT UK**, and students from other regional colleges in terms of registration and information accessibility.  
• Used HTML5, CSS3, Bootstrap, Javascript, and Netlify for deployment

## CERTIFICATION

- AWS Certified Cloud Practitioner
