Professional Summary

AWS-Certified Software Engineer with nearly 4 years of experience in building scalable full-stack web and cloud platforms using React.js, TypeScript, Node.js, REST APIs, and AWS. Skilled in frontend and serverless backend architecture, CI/CD pipelines, reusable component systems, and translating business requirements into maintainable solutions. Proven problem-solving in delivering responsive web interfaces, deployment workflows, and AI and LLM-powered features across enterprise applications.

Skills

Frontend — React.js, TypeScript, JavaScript (ES6+), Context API, Zustand, Tailwind CSS, Material UI, Ant Design, HTML, CSS.

Backend — Node.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), OAuth 2.0, OIDC.

Cloud / AWS — Lambda, S3, API Gateway, SNS, Step Functions, Amplify, Cognito, IAM, CloudWatch, CloudFront.

Developer Tools/ Testing — Git, GitHub, Bitbucket, AWS CodeCommit, Postman, Netlify, Webpack, npm, Vite, Jest (Basic).

Database — DynamoDB.

Programming Languages — C, C++

Work Experience

Tata Consultancy Services (AI Cloud), Software Engineer 09/2022 | Noida, Uttar Pradesh

- Architected serverless financial pricing engine for enterprise cost modelling using React.js, Node.js, AWS Lambda, API Gateway, DynamoDB, Cognito, SNS, and Step Functions, building **9+ event-driven** backend pricing model microservices for real-time financial pricing with 5-year forecast generation, offloading computation-heavy calculations across all financial models to Lambda for sub-second response times, automating **70%** of manual pricing workflows with **100%** reliability improvement.
- Led frontend architecture across 7 enterprise applications using React.js, TypeScript, Hooks, and Context API, building reusable component libraries. For the CCIM product on AWS, built scalable codebase with secure delivery via CloudFront, contributing to its recognition as **TCS Intellectual Property (IP) asset** and **AWS Marketplace** listing after security and compliance validation.
- Built a real-time cloud infrastructure observability module by configuring AWS CloudWatch metrics, alarms, and centralized logging across Lambda functions, API Gateway, and DynamoDB, providing deep visibility into request patterns, cold-start frequency, error logs, and latency, enabling operations team to monitor production systems without direct AWS Console access.
- Developed AI-powered features using RESTful APIs, AWS Bedrock, and Amazon Q, implementing secure S3 pre-signed URL ingestion workflows for dynamic PDF generation, reducing manual support traffic by **60%** and upload failures by **40%**.
- Implemented centralised RBAC authentication using AWS Cognito/IAM with Amazon Simple Notification Service (SNS) triggered admin notifications for signup approval and role assignment across applications, reducing access-control defects by **90%**.

Airtel Digital, Software Development Engineer Intern 09/2021 – 03/2022 | Gurugram, India

- Built multi-tenant Single Service Admin Portal with React.js, TypeScript, and Context API in collaboration with cross-functional teams, implementing LOB-specific RBAC to enable secure access across B2B and B2C portals for **400M+ Airtel customers**.
- Architected a no-code, config-driven UI platform with a dynamic Template Schema engine and API abstraction layer, reducing UI **deployment time** from **14 days** to **real-time** and eliminating developer dependency for content updates.

Personal Project

CloudX Suite 04/2025 – 06/2026

- Built a full-stack credit card analytics and blogging platform with HTML, CSS, JavaScript (ES6+), React.js, Typescript, Zustand, Hooks, Ant Design, Tailwind, Material UI, Node.js-based AWS Lambda functions, DynamoDB, Amazon S3, and API Gateway, featuring role-based Admin, User, and Guest dashboards secured with AWS Cognito, JWT authentication, and RBAC.
- Engineered an event-driven user signup workflow using AWS Step Functions and SNS, triggered via Cognito PostConfirmation, and implemented secure profile image uploads using S3 pre-signed URLs with file type and size validation.
- Developed a credit card comparison engine with sortable analytics across 9 platforms, along with an admin CRUD panel, dynamic forms, and a blog module with community feed, search, and pagination; built responsive role-based UIs with custom CSS, session management, auto-logout on JWT token expiry, and backend input validation with email sanitization across Lambda functions.

Education

Hemvati Nandan Bahuguna Garhwal University (A Central University) 2018 – 2022 | CGPA: 7.98/10
Bachelor of Technology, Information Technology

L.T.R Public School, 12th (Senior Secondary Examination), CBSE 2017 – 2018 | 84%

Meerut Public School, 10th (Secondary Examination), CBSE 2015 – 2016 | CGPA: 10/10

Certifications

- AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner
